Standards of Performance for New Stationary Sources: Volatile Organic Compound (VOC) Emissions From Synthetic Organic Chemical Manufacturing Industry (SOCMI) Distillation Operations and Reactor Processes; Amendment

AGENCY: Environmental Protection
Agency (EPA).

ACTION: Correcting amendment.

SUMMARY: This document contains amendments to the standards of performance for new, modified, and reconstructed distillation operations in the synthetic organic chemical manufacturing industry (SOCMI) (Subpart NNN) published on June 29, 1990, and for new, modified, and reconstructed reactor processes in the synthetic organic chemical manufacturing industry (SOCMI) (Subpart RRR) published on August 31, 1993. Amendments are made to the spelling of certain chemical names, the CAS numbers for certain chemicals, and some cross-reference drafting errors. A clarifying sentence is also being added to certain paragraphs to avoid inadvertent duplication of report requirements.

EFFECTIVE DATE: November 27, 1995.

FOR FURTHER INFORMATION CONTACT: For further information about this correction contact Mr. Warren Johnson, (919) 541-5124, Organic Chemicals Group, Emission Standards Division (MD-13), U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711.

SUPPLEMENTARY INFORMATION:

Background

This document amends §§ 60.665 and 60.667 of Subpart NNN, and §§ 60.700, 60.704, 60.705 and 60.707 of Subpart RRR of 40 CFR Part 60. These sections deal with the applicability, test methods and procedures, recordkeeping and reporting requirements for the standards

of performance for new, modified, and reconstructed distillation operations (Subpart NNN) and reactor processes (Subpart RRR) in the SOCMI industry.

As published, the final regulations contain spelling and CAS number errors for certain chemicals listed in § 60.667 Chemicals affected by Subpart NNN, and in § 60.667 Chemicals affected by Subpart RRR, respectively. This document serves to amend these errors.

As published, Subpart RRR, § 60.700 Applicability and designation of affected facility, contains some inadvertent cross-referencing errors which cause confusion in determining what is to be reported semiannually regarding exemptions for total resource effectiveness (TRE) greater than 8, production units with total design capacity of less than 1,100 tons per year, and facilities with low vent stream flow rates (0.011 scm/min). This document serves to amend these errors to language and meaning originally intended by the regulation.

As published on August 31, 1993 (58 FR 45948), Subpart RRR, § 60.704 Test methods and procedures, contains a calculation error in the TRE equation and some inadvertent cross-referencing errors which cause confusion in determining TRE and compliance procedures. The calculation error occurs in § 60.704(e)(1), which provides the equation for calculating the TRE index value. In this equation the first "0.88" is intended to be superscript, as it correctly appeared in the proposed rulemaking in the Federal Register, June 29, 1990 (55 FR 26945). The cross-referencing errors occur in § 60.704(f)(1) where notification is required for a recalculated TRE index value and § 60.704(h)(3) where method 18 is used to qualify for the total organic compound (TOC) low concentration exclusion. This document serves to amend these errors to language and meaning originally intended by the regulation.

As published, the reporting and recordkeeping requirements of Subparts NNN and RRR, in §§ 60.665 and 60.705, contain language that unintentionally infers duplication of process change reporting requirements. To eliminate this duplication, a sentence is being added to each of the §§ 60.665(l) (5) and (6) in Subpart NNN, and §§ 60.705(l) (4), (5), and (8) in Subpart RRR to clarify that these reports may be submitted either in conjunction with semiannual reports or as a single separate report. In addition, § 60.705(l)(1), which is a missing cross-reference causing confusion in determining appropriate reporting requirements for monitored exceedances, is also being amended to

be consistent with the proposed rulemaking in the Federal Register, June 29, 1990 (55 FR 26978). This document serves to amend the text to language and meaning originally intended by the regulation.

40 CFR Part 300

[FRL-5333-6]

National Oil and Hazardous Substances Pollution Contingency Plan; National Priorities List

AGENCY: Environmental Protection Agency.

ACTION: Notice of deletion of Woodbury Chemical Site from the National Priorities List.

SUMMARY: The Environmental Protection Agency (EPA) Region IV announces the deletion of the Woodbury Chemical Site, Princeton, Florida, from the National Priorities List (NPL). The NPL constitutes Appendix B which is 40 CFR part 300 the National Oil and Hazardous Substances Pollution Contingency Plan (NCP), which EPA promulgated pursuant to Section 105 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980, as amended. EPA and the State of Florida Department of Environmental Protection (FDEP) have determined that the Site poses no significant threat to public health or the environment and therefore, further response measures pursuant to CERCLA are not appropriate.

EFFECTIVE DATE: November 27, 1995.

ADDRESSES: Joe Franzmathes, Director, Waste Management Division, U.S. Environmental Protection Agency, 345 Courtland Street NE, Atlanta, Georgia 30365. Comprehensive information on

this Site is available through the Region IV public docket, which is available for viewing at the Woodbury Chemical information repositories at two locations. Locations and phone numbers are: U.S. EPA Record Center, 345 Courtland Street N.E., Atlanta, Georgia 30365, (404) 347-0506, and South Dade Regional Library, 10750 SW 211th Street, Cutler Ridge, Florida 33189, (305) 233-8140.

FOR FURTHER INFORMATION CONTACT: Joe Franzmathes, (404) 347-3454.

SUPPLEMENTARY INFORMATION: The Woodbury Chemical Site in Princeton, Florida, is being deleted from the NPL.

A Notice of Intent to Delete for this site was published on August 21, 1995 (60 FR 43424). The closing date for comments on the Notice of Intent to Delete was September 20, 1995. EPA received no comments and therefore did not prepare a Responsiveness Summary.

The EPA identifies sites which appear to present a significant risk to public health welfare, or the environment and it maintains the NPL as the list of those sites. Sites on the NPL may be subject of Hazardous Substance Response Trust Fund (Fund-) financed remedial actions. Any site deleted from the NPL remains eligible for Fund-financed remedial actions in the unlikely event that conditions at the site warrant such action. Section 301.425(e)(3) of the NCP states that Fund-financed actions may be taken at sites deleted from the NPL in the unlikely event that conditions at the site warrant such action. Deletion of a site from the NPL does not affect responsible party liability or impede agency efforts to recover costs associated with response efforts.
